recruitment blueprints for any staffing requirement

Technical & Engineering Recruitment

INTRODUCTION

Provision of Temporary Contract Personnel

Thank you for taking the time to read this information pack and we hope it proves to be both helpful and informative, especially when you are looking to augment your existing Technical & Engineering personnel levels.

Personnel

We provide the services of experienced and professionally qualified Technical & Engineering personnel on a permanent, temporary or contract basis throughout the UK.

QUALITY & STANDARDS

We are members of the REC (The Recruitment and Employment Confederation) and all of our consultants are members of the IRP (Institute of Recruitment Professionals).

Additionally we are an Investor in People (IIP). Our commitment to training our staff in their individual markets allows us to deliver best practice and value to our clients

SERVICES WE PROVIDE

The personnel we provide are drawn from an extensive database which encompasses most geographical locations throughout Scotland. We take great care to ensure that all our candidates are genuinely qualified in their respective fields, carry a valid trade card, and that their experience is relative to the details contained within their CVs.

The Technical & Engineering Division is a part of Blueprint Recruitment Group who specialise in the supply of Technical & Engineering, Construction, Civil & Building Services staff to our Main Contracting, Commercial & Industrial, Oil / Petrochemical/ Pharmaceutical & Facilities Management clients.

ADDITIONAL SERVICES

A further service that Blueprint Recruitment provides is the recruitment on behalf of the client company of suitably qualified personnel that the client company wishes to employ on a permanent staff basis. This is undertaken by utilising our Search and Selection process whereby the client company will provide a specific job description. Working within this remit we will search for and select prospective candidates that both qualify and are interested in the position on offer. Subsequently, we will present the candidates to the client company for final selection, interview and culminating in a mutually agreed offer of corporate employment.

ACTIVITIES & TERMS

Activities

Whilst the details contained in this presentation highlight our principal activities we can help with other aspects of recruitment solutions. We would be delighted at any time to visit the potential client company, by prior arrangement, and discuss in detail any specific recruitment challenges that the client company feels we could help with. Please visit our website for information on all the services we offer, www.blueprint-recruitment.co.uk.

Terms and Conditions

Our terms and conditions of business together with any specific hourly charge rate quotations for any of the services that we provide will be supplied upon request. We trust that this information proves to be helpful when you are next looking for a recruitment solution, at which time, we will look forward to the opportunity of demonstrating the quality of our services.

HEALTH & SAFETY

We operate a strict health & safety policy of which our potential contractors are made aware of by means of personal induction training and hand book issue. This policy is allied to an internal quality assurance practice which all of our contractors are encouraged to adhere to at all times. A copy of our quality manual and working practices can be made available to potential client companies upon request.
